+ WORKPLACE INSTALLATION | IN PROGRESS

FURNITURE AND POWER. ONE FIELD SCOPE. ONE ACCOUNTABLE TEAM.

ASI's Atlanta scope connected furniture supply, receiving, storage, delivery and installation, with power-whip coordination linked to workstation assembly.

CONNECTED SCOPE

OVERVIEW

CHALLENGE

Office furniture installation depends on more than assembly. Product receiving, local storage, delivery and electrical power interfaces must connect with the arrangement of workstations and private offices inside the existing suite.

ASI APPROACH

ASI's assignment brought furniture procurement and field installation into one coordinated scope. Workstations, desks and storage were assembled within the existing workplace, with electrician power-whip installation included in the delivery and installation package.

RESULTS

- Open-office installation underway
- Private-office furniture in place
- Power-whip coordination in scope

CIM GROUP | ATLANTA

At 101 Marietta Street, Suite 2240, ASI's workplace installation scope connected furniture supply and delivery with open-office and private-office assembly. The installation sits within the existing suite; retained walls, glazing, ceilings and flooring are not new tenant construction.

+ THE ASI DELIVERY MODEL

CONNECT THE DELIVERY AND CREWS.
ALIGN FURNITURE WITH POWER.

Receiving, delivery, furniture assembly and power-whip coordination were linked within ASI's Atlanta assignment. The field work addressed an office furnishing transition inside an existing suite.

SUPPLY

CONNECT THE FURNITURE PACKAGE

Bring workstation and private-office products into one furnishing scope, including desks, storage and the components needed for installation.

RECEIVE

LINK RECEIVING AND LOCAL STORAGE

Connect freight and local warehouse receiving with storage and planned delivery. Keep the supply chain aligned with the field installation scope.

DELIVER

CONNECT DELIVERY WITH ASSEMBLY

Carry the furniture package from local storage into the office installation. Connect workstation rows, desks and storage with the field crew's assembly work.

POWER

COORDINATE THE POWER-WHIP INTERFACE

Include electrician power-whip installation alongside furniture delivery and assembly. Keep electrical completion separate from the visible furniture-installation stage.

INSTALL

WORK WITHIN THE EXISTING SUITE

Assemble open-office workstations and private-office furniture without representing retained walls, ceilings, glazing or flooring as new ASI tenant construction.

APPROACH
Connected field scope

STATUS
IN PROGRESS

ONE TEAM CONNECTED THE FIELD INTERFACES

Furniture procurement, freight, receiving, local storage, delivery and installation formed one documented ASI assignment. Workstation assembly and private-office furnishing connect to the recorded electrician power-whip scope.

SUPPLY	RECEIVE	STORE	DELIVER	ASSEMBLE	COORDINATE

ONE ACCOUNTABLE PARTNER FOR WORKPLACE INSTALLATION AND ITS FIELD INTERFACES.

+ THE OUTCOME

WORKPLACE INSTALLATION UNDERWAY.
CONNECTED FIELD RESPONSIBILITIES.

Workstations, desks and storage are in place at the installation stage inside the existing Atlanta suite. Furniture assembly, logistics and the documented power-whip interface remain one connected assignment.

OPEN OFFICE

WORKSTATION INSTALLATION

Panel, glass, worksurface and storage assemblies define the open-office installation stage.

PRIVATE

OFFICE FURNITURE

Desks and storage are positioned in a distinct private-office installation area.

LINKED

FURNITURE AND POWER

Power-whip coordination belongs to the installation scope, not an inferred commissioning result.

WHAT THE PROJECT DELIVERED

OPEN-OFFICE ASSEMBLY

Workstation rows combine panel systems, frosted glass, worksurfaces and storage within the retained office.

PRIVATE-OFFICE INSTALLATION

Desks, drawer storage and open shelving form a different workplace area, with installation status still In Progress.

LOGISTICS AND FIELD WORK

Receiving, storage, delivery and installation were included together in ASI's furnishing assignment.

TECHNICAL SCOPE BOUNDARIES

Electrician power-whip installation was included, while visible assembly does not certify energized power or completed testing.

ONE ACCOUNTABLE PARTNER.
FURNITURE, LOGISTICS AND POWER INTERFACES, CONNECTED.

DELIVERY RESULT

ASI's Atlanta assignment connected furniture supply and logistics with open-office and private-office installation and power-whip coordination. The visible installation stage shows real workplace assembly inside the existing suite without claiming architectural renovation or final electrical closeout.
