+ SELECTIVE REMOVALS AND RETAINED WORKPLACE ASSETS

CLEAR WHAT MOVES.
RETAIN WHAT STAYS.
ONE ACCOUNTABLE TEAM.

ASI coordinated selective removals and workplace-clearance work at Thomson Reuters' Los Angeles office, connecting designated items, retained furniture and building interfaces within one origin-phase assignment.

OVERVIEW

CHALLENGE

Client directions separated what would move from what would remain. Office contents, selected items, retained workstations and shelving required clearly defined handling and retention boundaries within the same workplace.

ASI APPROACH

ASI brought selective removal, suite cleanup and targeted wall-patching requirements into one origin-phase package. The work followed the client's retention directions and connected removal handling with building access.

RESULTS

- Cleared corner-office area
- Designated workstation furniture retained
- Contents removed from retained shelving

THOMSON REUTERS | LOS ANGELES

The Los Angeles origin phase formed part of a broader workplace transition. These views show selective clearance alongside furniture and shelving designated to remain within the existing workplace.

APPROACH
Connected field package

+ THE INTERIOR SCOPE

SELECTIVE WORKPLACE CLEARANCE.
RETAINED ASSETS IN CONTEXT.

The same workplace combined cleared office areas with retained cubicles and shelving. Client Stay/Go directions defined those boundaries, making selective handling the central field requirement.

DESIGNATED ITEMS

RETAIN

CLIENT-DIRECTED ASSETS

CONNECT

REMOVALS AND ACCESS

Selective contents work

A cleared corner office, retained workstation cluster and empty shelving show different origin-area conditions. Existing furniture, floor finishes and installed building services remain in context around the selective contents work.

Removal interfaces

The assigned package included suite cleanup, battery recycling, artwork-hole patching and access work. Temporary glass-door removal belonged to a separate access workstream.

+ THE ASI DELIVERY MODEL

DEFINE WHAT MOVES.
CONNECT THE FIELD INTERFACES.

ASI coordinated the origin work around designated removal and retention boundaries. Contents handling, cleanup, targeted wall work and access requirements were linked in the same assignment.

PLAN

FOLLOW CLIENT RETENTION DIRECTIONS

Separate designated move items from cubicles, office furniture and shelving instructed to remain.

REMOVE

HANDLE SELECTED ITEMS AND CONTENTS

Connect selective removal and handling with the origin workplace-clearance sequence.

RETAIN

KEEP DESIGNATED WORKPLACE ASSETS

Client-directed retention kept designated cubicles, office furniture and shelving outside the general removal package.

PATCH

ADDRESS ARTWORK REMOVAL POINTS

Connect the assigned artwork-hole patching requirement with affected wall locations after artwork removal.

ACCESS

CONNECT HANDLING AND ACCESS WORK

Coordinate building-access requirements with selective removals and cleanup. Keep temporary door access work in its defined workstream.

STATUS
ORIGIN CLEARANCE

ONE TEAM CONNECTED THE FIELD INTERFACES

Client-directed removal and retention boundaries shaped the field sequence. ASI connected selective handling, cleanup and the affected wall/access requirements within the Los Angeles origin assignment.

DEFINE	SELECT	HANDLE	RETAIN	PATCH	CLEAR

ONE ACCOUNTABLE PARTNER FOR SELECTIVE CLEARANCE AND ITS FIELD INTERFACES.

+ THE OUTCOME

CLEARANCE WHERE DIRECTED.
RETAINED ASSETS PRESERVED.

Three distinct Los Angeles origin views show a cleared corner office, retained workstations and empty retained shelving. Together they explain the selective-clearance conditions within the existing workplace.

CLEARED

CORNER-OFFICE AREA

The broad corner-office view shows a cleared workplace footprint within the existing building.

RETAINED

DESIGNATED FURNITURE

The workstation cluster remains consistent with the client's retention instructions.

SELECTIVE

CONTENTS CLEARANCE

Shelving remains while its contents have been removed.

WHAT THE PROJECT DELIVERED

OFFICE-AREA CLEARANCE

The Los Angeles corner-office image shows a cleared footprint with existing finishes and services retained.

CLIENT-DIRECTED RETENTION

Retained workstation furniture and shelving align with the client's defined origin-scope directions.

CONNECTED WALL AND ACCESS SCOPE

Artwork-hole patching and temporary access work formed defined requirements within the same origin package.

ORIGIN-PHASE COORDINATION

Selected items, retained assets, cleanup and access were connected within the Los Angeles field assignment.

ONE ACCOUNTABLE PARTNER.
SELECTIVE REMOVALS AND RETAINED ASSETS, CONNECTED.

DELIVERY RESULT

ASI coordinated selective Los Angeles origin work around the client's move and retention directions. Cleared office areas, retained workstations and emptied shelving show distinct conditions within that field sequence.

PLANNING A SELECTIVE WORKPLACE TRANSITION?

LOS ANGELES OFFICE CLEARANCE | IN PROGRESS

SELECTIVE CLEARANCE NEEDS DEFINED BOUNDARIES.

What moves and what remains affects handling, access and the surrounding workplace. ASI connected the origin requirements in one field package while keeping retained assets and later transition phases distinct.
