+ COORDINATED WORKPLACE TRANSITIONS

DIFFERENT OFFICES. CONNECTED SCOPES. ONE PARTNER.

ASI coordinated furniture, relocation, technology interfaces and office exits for Brown and Caldwell, adapting the delivery plan to each workplace.

PLAN	DELIVER	CLOSE
SITE REQUIREMENTS	CONNECTED SCOPES	DEFINED PHASES

OVERVIEW

CHALLENGE

Workplace changes bring different deadlines and responsibilities into the same space. Furniture availability, retained assets, technology relocation and office-exit conditions must be coordinated around each site's actual requirements.

ASI APPROACH

ASI connected planning, procurement, field teams and closeout. Blue Ash combined a destination setup with an origin exit; San Diego and Phoenix required coordinated transition phases; Maitland called for a defined decommissioning scope.

RESULTS

- Configured destination workspaces at Blue Ash
- Coordinated San Diego and Phoenix transitions
- Cleared and repaired Maitland exit spaces

BROWN AND CALDWELL

One workplace relationship, with delivery tailored to each office. These completed scopes show how ASI connects furniture, move coordination, trade interfaces and closeout without treating every location as the same project.

+ PLANS AND WORKPLACE INTERFACES

A PLAN FOR EACH OFFICE.
A CONNECTED DELIVERY MODEL.

Furniture layouts connect retained assets, new settings and circulation to real rooms. These Blue Ash and San Diego design-intent plans explain workplace configuration; they are not as-built or completion records.

+ THE ASI DELIVERY MODEL

LOCAL CONDITIONS.
CONNECTED RESPONSIBILITIES.

The delivery approach followed the requirements of each office, connecting furniture and move work to the utility, finish and closeout responsibilities those changes created.

PLAN

DEFINE THE SITE TRANSITION

Separate departing-space obligations from destination installation and later punch work. San Diego and Phoenix needed distinct phase boundaries as their transitions overlapped.

FURNISH

COORDINATE FURNITURE AND FIT

At Blue Ash, ASI coordinated new furniture and retained components. Field adjustments fitted reused workstation components to the destination layout.

CONNECT

MANAGE THE TRADE INTERFACES

Blue Ash connected furniture work with structured cabling, network and access-control installation. San Diego and Phoenix also included technical relocation and installation scopes.

MOVE

SEQUENCE RETAINED ASSETS

Connect furniture handling, temporary arrangements and destination work to each site's requirements. Keep separate deliveries and later follow-up distinct from completed local phases.

CLOSE

COMPLETE DEFINED EXIT WORK

At Maitland, ASI coordinated decommissioning, removal, localized paint-ready repairs and cleanup. Retained building elements remained in place.

STATUS
FEATURED SCOPES

ONE TEAM CONNECTED THE FIELD INTERFACES

ASI connected the furniture, relocation and trade responsibilities within each assigned scope. Site-specific plans and documented closeout kept origin work, destination installation and later follow-up clearly separated.

DEFINE	PLAN	COORDINATE	CONFIGURE	TRANSITION	CLOSE

ONE ACCOUNTABLE PARTNER, WITH RESPONSIBILITIES DEFINED FOR EACH SITE.

+ THE OUTCOME

FROM WORKPLACE CHANGE TO DOCUMENTED OUTCOMES.

The featured projects delivered different results: configured offices at Blue Ash, coordinated transition work in San Diego and Phoenix, and a cleared workplace at Maitland. Each outcome is tied to its defined local scope.

CONFIGURED

BLUE ASH WORKSPACES

Destination offices and workstations combined new furniture with retained components.

COORDINATED

PAIRED TRANSITIONS

San Diego and Phoenix connected furniture and relocation work with technical interfaces.

CLEARED

MAITLAND OFFICE EXIT

Removal, localized repairs and cleanup prepared the defined departing space for turnover.

WHAT THE PROJECT DELIVERED

FURNITURE MATCHED TO THE SPACE

Blue Ash field adjustments supported reuse within the destination layout, alongside new furniture coordination.

TECHNOLOGY CONNECTED TO THE MOVE

Technical relocation and installation responsibilities were addressed as part of the relevant site-transition scopes.

EXIT CONDITIONS KEPT IN VIEW

Maitland closeout addressed removal, wall attachment points and cleanup while preserving retained building elements.

ONE RELATIONSHIP, CLEAR BOUNDARIES

The site examples share coordinated ASI delivery, while preserving each office's distinct scope, phase and closeout record.

ONE ACCOUNTABLE PARTNER. SITE-SPECIFIC WORKPLACE EXECUTION.

DELIVERY RESULT

ASI connected multiple workplace responsibilities through one accountable relationship, adapting field delivery to each location and documenting the outcome of the assigned scope.

DIFFERENT SITES. ONE ACCOUNTABLE RELATIONSHIP.

Furniture configuration, relocation interfaces and office closeout require a plan that fits the workplace. ASI connects those responsibilities while keeping each site's outcome and retained elements clearly defined.
