

+ FURNITURE MOVES AND CONSTRUCTION ACCESS

CLEAR THE WORK AREA. RETURN THE FURNITURE. KEEP THE PHASES CONNECTED.

ASI coordinated repeated onsite furniture moves and reset activities around construction work at First American Title's Bend workplace.

THE SPACE

OVERVIEW

CHALLENGE

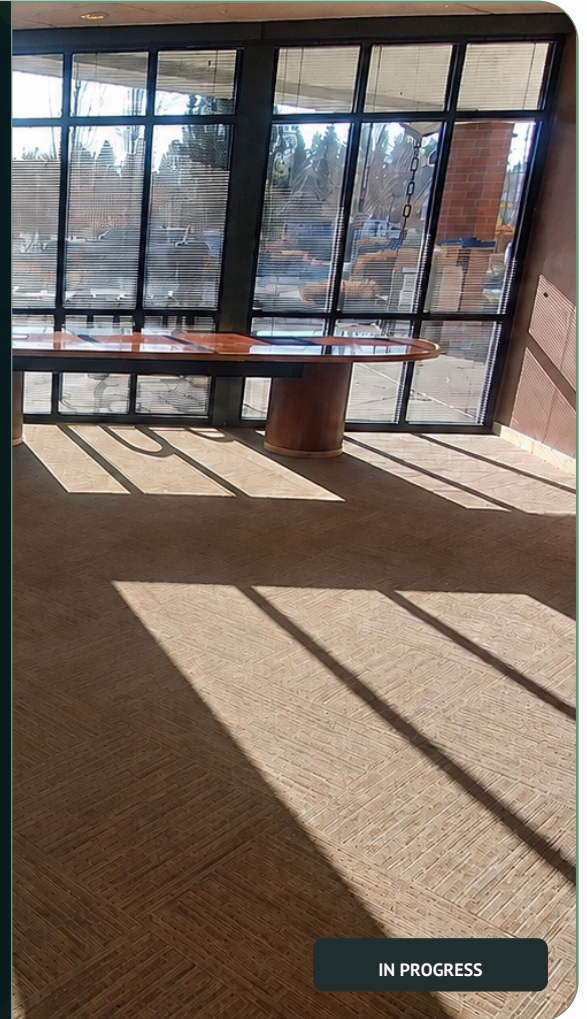

Furniture had to be moved out of selected work areas and returned around a phased office improvement program. Each visit needed a defined scope and a clear connection to the next trade's access.

ASI APPROACH

ASI coordinated furniture crews for sequenced removal and return visits, connecting conference-room furniture and filing-cabinet movement to the construction work areas.

RESULTS

- Documented furniture movement at one workplace.
- Removal and reset connected to construction access.
- Repeated visits organized as defined phase scopes.

IN PROGRESS

FIRST AMERICAN TITLE | BEND

The Bend assignment was a phased workplace transition, not a single truck move. ASI managed the defined furniture movement and return activities around the client's construction program.

PROJECT INFO

CLIENT

First American Title

LOCATION

Bend, Oregon

WORKPLACE

Onsite furniture transition

INTERFACE

Construction access

DELIVERY

Removal and reset visits

FEATURED PHASE

In Progress

+ THE INTERIOR SCOPE

MAKE ROOM FOR THE WORK.

CONNECT EACH FURNITURE MOVE.

Clearing a work area is one step in a phased workplace change. Tables, chairs and filing cabinets needed defined removal and return activities while the client's other providers worked through the office.

MOVE

DEFINED FURNITURE SCOPE

PHASE

CONSTRUCTION ACCESS

RESET

SEQUENCED RETURN VISITS

CLEAR SELECTED WORK AREAS

ASI arranged onsite furniture movement to create access for the construction work. The move scopes covered conference tables and chairs, then filing cabinets in later work areas, with defined crews and equipment.

CONNECT REMOVAL AND RETURN

Furniture removal and reset were paired activities around the client's improvement work. ASI coordinated repeat visits at the same Bend office, keeping furniture movement connected to the phase sequence.

+ THE OUTCOME

FURNITURE MOVES WITH A PURPOSE.

A COORDINATED WORKPLACE TRANSITION.

ASI's defined furniture work supported a phased construction program at one workplace. Documented movement and return activities connected the furniture scope to the spaces being worked on.

MOVE

DEFINED WORK AREAS

Furniture movement created access in selected parts of the office.

RESET

RETURN VISITS

Removal and return activities were connected to the improvement sequence.

ALIGN

REPEAT FIELD VISITS

Defined phase scopes connected each visit to the same workplace.

WHAT THE PROJECT DELIVERED

FURNITURE MOVEMENT

Conference tables and chairs were moved within the office for the construction transition.

FILING-CABINET RESET

Later removal and return activities addressed filing cabinets in another work area.

CONSTRUCTION INTERFACE

The furniture scope connected to the client's phased construction access requirements.

DEFINED RESPONSIBILITY

ASI coordinated the furniture crews and equipment while the client's other providers performed their own work.

ONE ACCOUNTABLE PARTNER.
FROM SELECTED WORK AREAS TO FURNITURE RESET.

DELIVERY RESULT

ASI connected furniture movement, repeated onsite visits and reset activities at First American Title's Bend workplace under one accountable furniture-transition partner.
