

+ PANEL RECONFIGURATION AND FIELD ADAPTATION

RECONFIGURE THE PANELS. ADAPT THE CONNECTIONS. ONE ACCOUNTABLE PARTNER.

ASI coordinated defined panel reconfiguration, controlled workstation teardown and onsite connector adaptation at First American Title's Cleveland workplace.

OVERVIEW

CHALLENGE

Changing an existing panel system required more than moving furniture. Workstation teardown and connector fit had to be coordinated within the retained workplace layout.

ASI APPROACH

ASI connected selective panel swaps, defined station teardown and onsite connector adaptation, with signed field completion for the documented visit.

RESULTS

- Defined panel-change visit completed.
- Station teardown and connector adaptation coordinated.
- Documented field work signed complete.

FIRST AMERICAN TITLE | CLEVELAND

ASI managed a defined workplace panel-adaptation assignment in Cleveland, coordinating selective removal with field-fit adjustments to the existing furniture system.

PROJECT INFO

CLIENT

First American Title

LOCATION

Cleveland, Ohio

SITE

1100 Superior Avenue, Suite 200

SCOPE

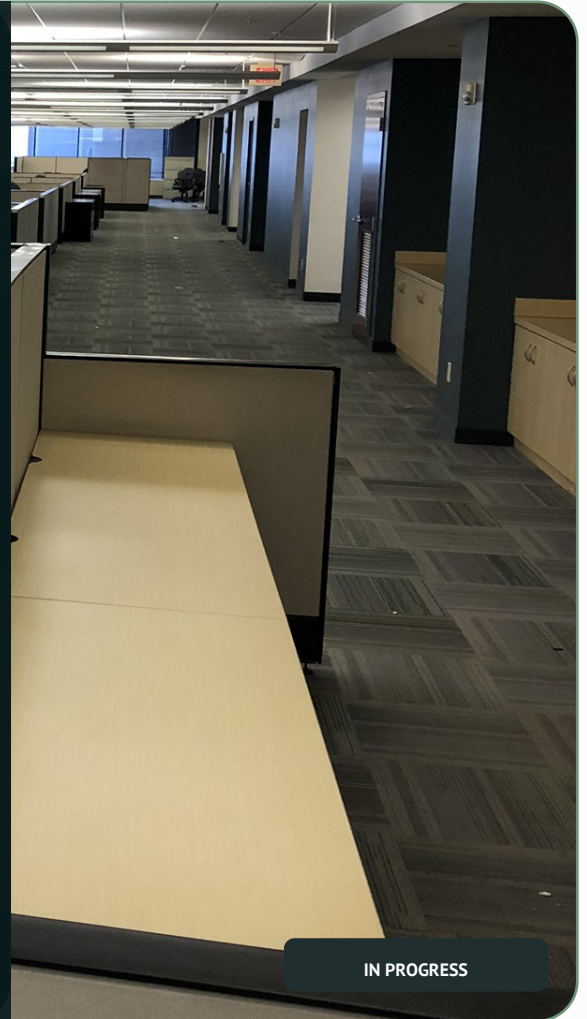

Panel adaptation

DELIVERY

Reconfigure and fit

STATUS

Panel-change visit complete

IN PROGRESS

+ THE INTERIOR SCOPE

PANEL CHANGES AFFECT THE WHOLE LAYOUT. CONTROL THE FIELD INTERFACES.

Panel reconfiguration connected to workstation teardown and onsite fit. The retained furniture, circulation and storage areas explain the workplace setting around that defined assignment.

RECONFIGURE

SELECTIVE PANEL CHANGES

CONNECTORS CUT TO FIT

COORDINATE

TEARDOWN AND FIELD WORK

ADAPT THE EXISTING SYSTEM

The signed visit connected panel swaps, selective workstation teardown and connectors cut down onsite. ASI managed that defined change within the existing furniture system.

PRESERVE THE WORKPLACE CONTEXT

Retained cabinets, workstations and circulation framed the assignment. Furniture movement and controlled removal supported the adjustment within an established workplace.

+ THE OUTCOME

A DEFINED PANEL CHANGE. AN ACCOUNTABLE FIELD DELIVERY.

The documented panel-change visit reached signed completion. ASI brought selective teardown, panel reconfiguration and onsite connector adaptation together under one accountable delivery scope.

RECONFIGURE

EXISTING PANEL SYSTEM

Selective panel swaps adapted the retained workplace furniture layout.

FIT

ONSITE CONNECTORS

Connector adaptation was incorporated into the documented field scope.

COMPLETE

DEFINED FIELD VISIT

Signed completion records close the specific panel-change assignment.

WHAT THE PROJECT DELIVERED

SELECTIVE TEARDOWN

Defined workstation teardown made the panel-change work possible.

PANEL RECONFIGURATION

The documented visit included swapping panels within the existing furniture system.

ONSITE ADAPTATION

Connectors were cut down onsite as part of the recorded field assignment.

ACCOUNTABLE CLOSEOUT

Contractor completion and verification were signed for the defined visit.

ONE ACCOUNTABLE PARTNER.
FROM SELECTIVE TEARDOWN TO FIELD FIT.

DELIVERY RESULT

ASI connected the defined panel changes, workstation teardown and onsite connector adaptation through signed field delivery, with one accountable partner for the workplace adjustment.
