

+ CONTENTS. ACCESS. DEFINED EXIT WORK.

# MOVE THE CONTENTS. PROTECT THE ACCESS. CONNECT THE OFFICE EXIT.

ASI connected a defined office-contents move with building protection and separate origin signage and electrical exit responsibilities.

## MOVE

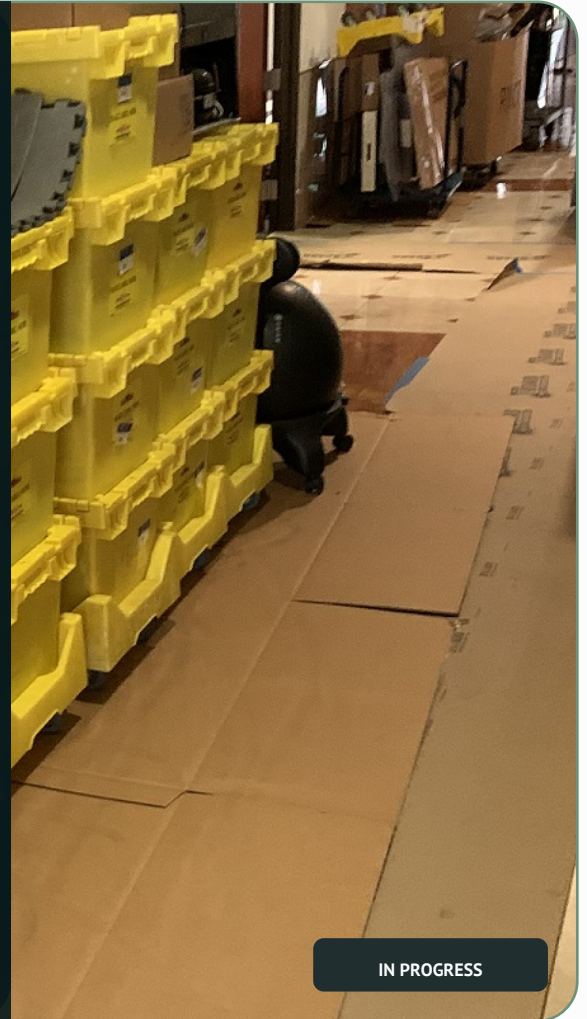

OFFICE CONTENTS

## PROTECT

COMMON-AREA ACCESS

## EXIT

SEPARATE ORIGIN SCOPE

IN PROGRESS

## OVERVIEW

### CHALLENGE

First American's office contents needed to move between two Escondido addresses while respecting shared-property access and destination protection. Signage and electrical exit work at the origin had a separate scope.

### ASI APPROACH

ASI coordinated contents handling, reusable moving crates and delivery placement, with common-area protection. The origin sign-removal and electrical safe-off responsibilities stayed distinct from the move.

### RESULTS

- Defined office-contents relocation completed.
- Protected access connected with delivery handling.
- Origin exit responsibilities kept separately scoped.

## FIRST AMERICAN | ESCONDIDO

The assignment connected the office-contents move from 800 La Terraza Boulevard to 500 La Terraza Boulevard with protected common-area access and separately scoped origin sign-removal and electrical exit work.

## PROJECT INFO

### CLIENT

First American Title

### LOCATION

Escondido, California

### MOVE

Office contents

### PROTECTION

Common-area access

### ORIGIN EXIT

Signage and electrical

### DELIVERY

Defined destination layout

+ THE INTERIOR SCOPE

# TWO ADDRESSES. SHARED ACCESS.

## PROTECTION THROUGH THE MOVE.

A local office transition still required careful control of access, staging and delivery placement. The protected destination threshold and common areas show how the move interface extended beyond the office itself.

### CONTENTS

DEFINED HANDLING SCOPE

### ACCESS

BUILDING PROTECTION

### ORIGIN EXIT

SEPARATE RESPONSIBILITIES

### CONTROL CONTENTS AND PLACEMENT

Personal desk and file contents, office and breakroom supplies, wall art and plants were part of the defined move. Reusable crates were placed according to the destination seating chart, keeping delivery tied to the receiving layout.

### PROTECT THE BUILDING INTERFACE

The work order required protection of destination common-area floors and walls, with attention to entrance access and parking. At the origin, shared-property access could not be blocked by the move operation.

**+ THE OUTCOME**

# OFFICE CONTENTS RELOCATED. RELATED EXIT WORK KEPT DEFINED.

ASI completed the defined office-contents relocation and connected it with destination protection and receiving placement. Separate origin signage and electrical responsibilities remained clearly scoped rather than being confused with a full renovation.

## RELOCATE

**OFFICE CONTENTS**

The defined contents move connected the origin and destination offices.

## PROTECT

**COMMON-AREA ACCESS**

Building protection and access constraints stayed part of the delivery plan.

## CONNECT

**ORIGIN EXIT SCOPE**

Separate signage and electrical responsibilities were coordinated alongside the move.

## WHAT THE PROJECT DELIVERED

### CONTENTS HANDLING

Personal and file contents, supplies, wall art and plants followed the defined relocation scope.

### DESTINATION PLACEMENT

Reusable moving crates were delivered according to the receiving seating chart.

### PROPERTY INTERFACE

Common-area protection connected with entrance, parking and shared-property access requirements.

### SEPARATE ORIGIN EXIT

Sign-removal and electrical safe-off responsibilities were separately scoped at the vacated office.

**ONE ACCOUNTABLE PARTNER.**  
**CONTENTS, BUILDING ACCESS AND DEFINED ORIGIN EXIT.**

**DELIVERY RESULT**

ASI coordinated a defined office-contents relocation, protected building access and separately scoped origin signage and electrical responsibilities across First American's Escondido transition.

**PLANNING A WORKPLACE TRANSITION?**
