+ FURNITURE MOVEMENT FOR FLOORING ACCESS

CLEAR THE WORK AREA. SEQUENCE THE RETURN. ONE ACCOUNTABLE PARTNER.

ASI coordinated furniture clearance and return across two floors at First American Title's Albany office, making space for another trade's carpet work.

DESK ARRANGEMENT

OVERVIEW

CHALLENGE

Desks and desk items had to move out of the carpet installers' work areas, then return to their original positions. The furniture sequence needed to connect access, temporary placement and the return visit across two floors.

ASI APPROACH

ASI defined the furniture movement around the flooring interface, coordinating access and temporary clearance before the return to original desk positions.

RESULTS

- Furniture moved clear of the carpet-work areas.
- Desks returned to original positions.
- One coordinated removal-and-return sequence across two floors.

FIRST AMERICAN TITLE | ALBANY, OREGON

The Albany assignment focused on the furniture dependency within a flooring project. ASI coordinated the clearance and return sequence, connecting access and temporary desk movement with another trade's carpet work.

CLIENT
First American Title

LOCATION
Albany, Oregon

PROJECT
Furniture clearance and return

FOOTPRINT
First and second floors

INTERFACE
Carpet work by others

FEATURED PHASE
Completed furniture return

+ THE INTERIOR SCOPE

MAKE ROOM FOR THE FLOORING WORK.
RETURN THE FURNITURE TO PLACE.

Flooring access depended on a coordinated furniture sequence. ASI moved desks and desk items out of the installers' way, then returned the furniture to its original positions once the work area was available.

CLEARANCE

CARPET-WORK ACCESS

SEQUENCE

TWO-FLOOR FURNITURE MOVE

RETURN

ORIGINAL DESK POSITIONS

CONTROL THE FURNITURE DEPENDENCY

The assignment linked key pickup, first- and second-floor desk movement, temporary placement and a defined return visit. ASI kept the furniture responsibility connected to the carpet installers' need for access.

BRING THE DESKS BACK TO PLACE

The furniture returned to its original arrangement through the same defined assignment. ASI connected temporary placement with the return visit, keeping the desk movement coordinated around carpet work performed by another trade.

+ THE OUTCOME

ONE CONTROLLED FURNITURE SEQUENCE.
CLEAR THE AREA, THEN RETURN TO PLACE.

ASI completed the defined furniture-clearance and return assignment at one Albany workplace. The result connected temporary desk movement with the return to original positions around carpet work performed by others.

ACCESS

FLOORING WORK AREAS

Furniture movement made room for the carpet installers' work areas.

SEQUENCE

REMOVAL AND RETURN

Access, temporary placement and return formed one defined furniture assignment.

RETURN

ORIGINAL POSITIONS

Desks were returned to their original arrangement across the defined workplace areas.

WHAT THE PROJECT DELIVERED

FURNITURE CLEARANCE

Desks and desk items moved out of the way for the carpet installers.

TWO-FLOOR COORDINATION

First- and second-floor furniture movement stayed within one controlled sequence.

DEFINED RETURN VISIT

The assignment included bringing the desks back to their original positions.

CLEAR TRADE INTERFACE

ASI's furniture work supported flooring access while carpet work remained with another trade.

ONE ACCOUNTABLE PARTNER.
FROM TEMPORARY CLEARANCE TO FURNITURE RETURN.

DELIVERY RESULT

ASI connected furniture removal, temporary placement and return under one accountable workplace execution partner for First American Title's Albany office.
