+ OFFICE AND WAREHOUSE EXIT

CLEAR THE SPACE.
REPAIR THE WALLS.
CONNECT THE WORK.

ASI coordinated office and warehouse clearance, localized wall repairs and cleaning for a Geotech Supply lease-return assignment in Anaheim.

FIELD RESPONSIBILITIES

OVERVIEW

CHALLENGE

The vacant office and warehouse needed clearance, localized repairs and cleaning as the lease-return date approached. Existing lighting lacked power at the panel, adding a practical field-work constraint.

ASI APPROACH

ASI connected removal support, wall restoration and cleaning in one field assignment, and procured a generator and temporary lighting to support work within the existing building.

RESULTS

- Warehouse area cleared and cleaned
- Localized wall repairs completed
- Front-office interior cleared

GEOTECH SUPPLY | ANAHEIM

Working with Hilldrup / WeSolve, ASI coordinated a practical workplace-exit scope at the La Loma Circle office and warehouse: removal, localized wall repairs and cleaning within the existing building.

PROJECT INFO

SITE
Geotech Supply

LOCATION
Anaheim, California

PARTNER
Hilldrup / WeSolve

ENVIRONMENT
Office and warehouse

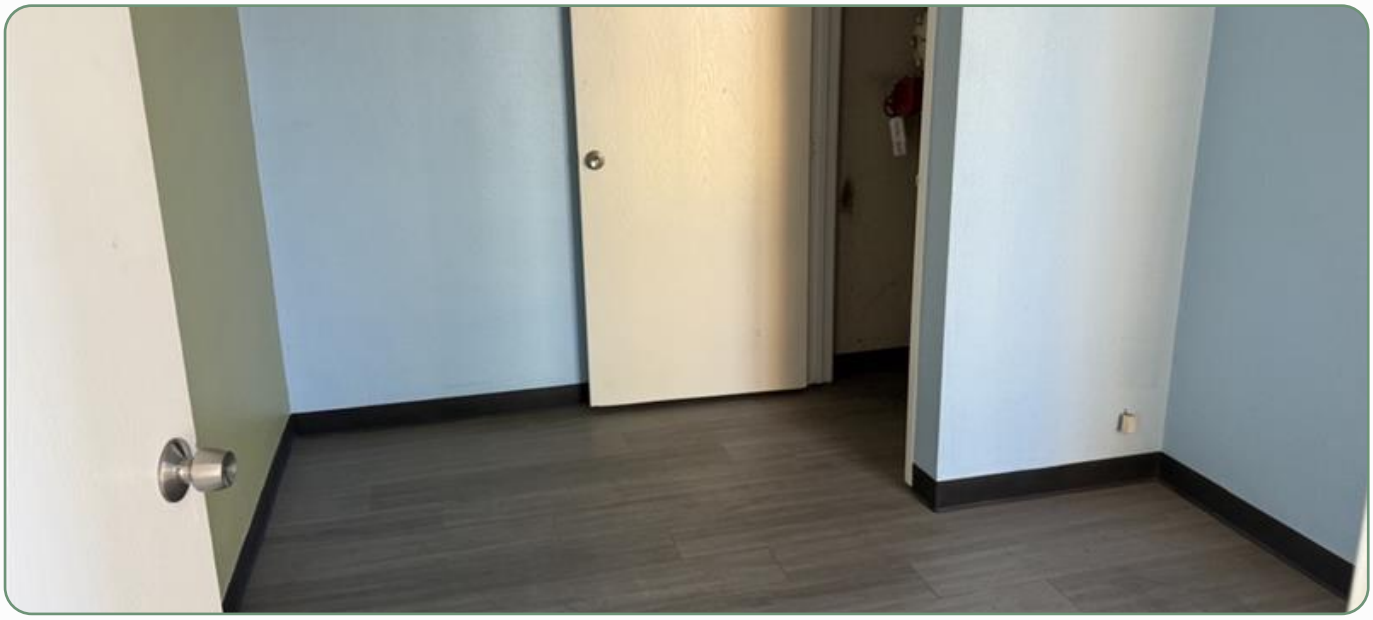

FOCUS
Exit restoration

DELIVERY
Coordinated field work

+ OFFICE AND WAREHOUSE COORDINATION

DIFFERENT SPACES.
CONNECTED EXIT RESPONSIBILITIES.

The assignment connected the front office with an open warehouse. Contents clearance, localized repairs and cleaning each addressed a different part of the same workplace exit.

Front-office clearance and cleaning | Completed

WAREHOUSE

CLEARANCE AND CLEANING

OFFICE

CONTENTS CLEARANCE

WALLS

LOCALIZED REPAIR

REPAIR THE AFFECTED AREAS

Localized wall openings and damaged areas were addressed within the retained warehouse interior. Targeted repairs connected the affected surfaces with the existing building finishes.

SUPPORT THE FIELD WORK

With no lighting power available at the panel, ASI procured a generator and temporary lighting to support field work. That practical requirement was coordinated with clearance, repairs and cleaning.

+ FIELD EXECUTION

FIELD WORK, AREA BY AREA.
CLEARANCE AND LOCALIZED REPAIR.

Wall repair and cleaning took place within the existing building. The repaired surfaces and cleared interiors show the practical scope of the assignment, with retained materials left in place.

LOCALIZED WALL RESTORATION | COMPLETED

WAREHOUSE CLEANING | IN PROGRESS

OFFICE CLEARANCE | COMPLETED

THE DETAIL WORK CONNECTED THE EXIT.

A coordinated workplace exit brings removal, local repairs and cleaning into one field effort. Here, the work addressed specific wall conditions and removed remaining contents from the existing office and warehouse.

+ THE OUTCOME

REPAIRED WALLS.
CLEARED OFFICE AND WAREHOUSE.

ASI brought targeted restoration and practical clearance work into one coordinated assignment, connecting the needs of a vacant office and warehouse with the lease-return process.

REPAIRED

LOCALIZED WALL AREAS

Damaged wall areas were repaired within the retained warehouse interior.

CLEARED

OFFICE AND WAREHOUSE

Contents clearance and cleaning opened the existing interior spaces.

CONNECTED

RESTORATION AND REMOVAL

Repair, removal and cleaning responsibilities were coordinated within one workplace-exit assignment.

WHAT THE PROJECT DELIVERED

TARGETED RESTORATION

Localized wall repairs addressed the affected surfaces while retained building elements remained in place.

OFFICE CLEARANCE

The front office was cleared and cleaned while its existing layout and finishes remained.

TEMPORARY WORK LIGHTING

Generator and temporary-lighting procurement supported field work where the building lighting lacked panel power.

ONE ACCOUNTABLE PARTNER

ASI coordinated the field responsibilities with Hilldrup / WeSolve for the site exit.

ONE ACCOUNTABLE PARTNER.
RESTORATION AND CLEARANCE, CONNECTED.

DELIVERY RESULT

The result was cleared office and warehouse space with localized wall repairs and cleaning, delivered through a coordinated field assignment.
