OVERVIEW

CHALLENGE

The replacement workstation layout had to fit an existing office setting. Furniture removal, retained desks, new assemblies and field repair interfaces required coordinated attention throughout the installation.

ASI APPROACH

ASI connected the furniture scope, manufacturer configuration and field installation, accounting for retained desks and coordinating specific cubicle repairs and interior-window privacy film.

RESULTS

- Replacement workstations installed.
- Selected existing desks retained.
- Interior-window privacy film installed.

ORION RISK MANAGEMENT | IRVINE

For Orion Risk Management in Irvine, ASI coordinated the replacement of existing office furniture with a new workstation system. Furniture removal, assembly, retained desks and targeted field repairs came together within the existing office, alongside interior-window privacy film.

+ THE ASI DELIVERY MODEL

REMOVE. ASSEMBLE. COORDINATE.
CONNECT THE WORKPLACE TRANSITION.

ASI connected the replacement furniture system with the existing office and the field work around it, coordinating removal, assembly, retained desks and targeted repairs.

REMOVE

MANAGE THE FURNITURE TRANSITION

Existing furniture was removed and the new workstation system was delivered and installed within the same office setting.

BUILD

ASSEMBLE THE WORKSTATION SYSTEM

The replacement installation brought panels, glass extensions and worksurfaces together around the workstation circulation.

REUSE

ACCOUNT FOR RETAINED FURNITURE

Selected existing sit-to-stand desks were retained within the replacement furniture scope.

FIELD

ADDRESS SPECIFIC CUBICLE REPAIRS

Specific cubicle electrical repairs connected targeted field work with the physical furniture installation.

FILM

INSTALL INTERIOR-WINDOW PRIVACY FILM

Privacy film was installed on an interior window as a distinct workplace finish treatment.

STATUS
INSTALLED PHASE

ONE TEAM CONNECTED THE FIELD INTERFACES

ASI connected the workstation configuration, furniture transition, installation and targeted field repairs within the existing workplace.

DEFINE | REMOVE | RETAIN | ASSEMBLE | REPAIR | FINISH

Furniture transition. Retained desks. Targeted repairs. Privacy finishes.

+ THE OUTCOME

WORKSTATIONS AND PRIVACY FINISHES.
ONE COORDINATED WORKPLACE PHASE.

Replacement workstations and interior-window privacy film were installed. ASI connected the furniture transition with retained desks and targeted cubicle repair work within the same existing workplace.

FURNITURE

ASSEMBLED SYSTEM

Replacement panels, glass extensions and worksurfaces installed.

RETAIN

EXISTING DESKS

Selected sit-to-stand desks retained within the replacement scope.

FILM

INSTALLED TREATMENT

Interior-window privacy film installed within the existing office.

WHAT THE PROJECT DELIVERED

A CONNECTED FURNITURE TRANSITION

Removal and replacement installation were connected within the same existing office.

RETAINED FURNITURE CONSIDERED

Selected existing desks were retained within the replacement furniture scope.

INTERIOR PRIVACY FINISH

The installed window film provided a distinct interior privacy treatment.

CONNECTED FIELD WORK

Furniture installation and targeted cubicle repairs were coordinated within the same workplace.

ONE ACCOUNTABLE PARTNER.
FURNITURE. FIELD WORK. PRIVACY FINISHES.

DELIVERY RESULT

One accountable partner connected furniture removal, replacement installation, retained desks and targeted finish work within one workplace transition.

COORDINATE YOUR NEXT WORKPLACE PROJECT.
