MASKING

OVERVIEW

CHALLENGE

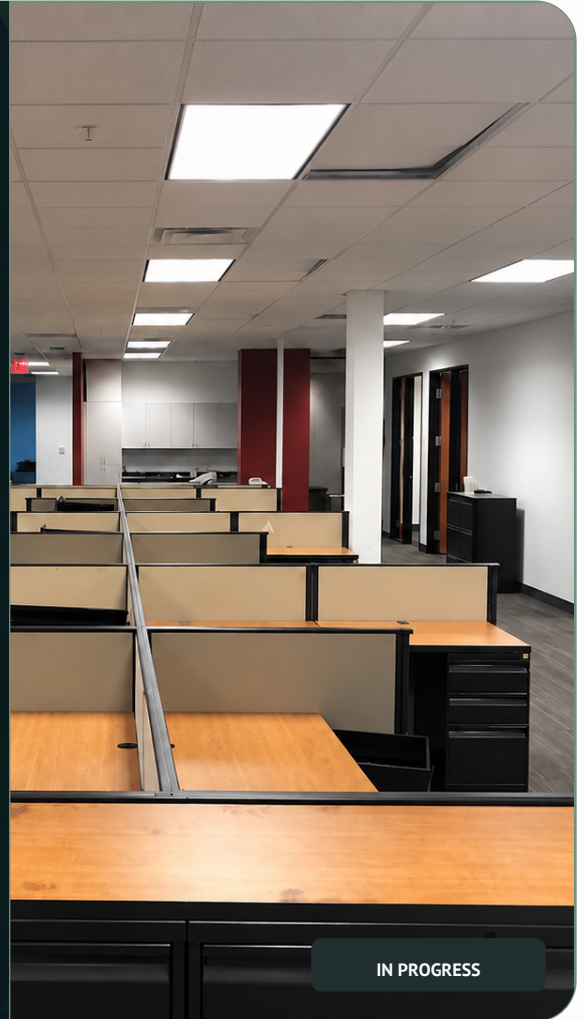

Furniture installation needed to connect with the office layout, power distribution and acoustic requirements. Later requests added defined adjustments at the same workplace.

ASI APPROACH

ASI coordinated furniture and storage handling with defined electrical, glass-panel and sound-masking scopes, keeping the workplace interfaces connected.

RESULTS

- Furniture installation and layout coordination.
- Defined electrical and sound-masking services.
- Later onsite adjustments tied to the workplace.

FIRST AMERICAN TITLE | LAS VEGAS

The Las Vegas assignment joined furniture, technical infrastructure and follow-up services in one coordinated workplace scope, bringing layout decisions and field execution together.

PROJECT INFO

CLIENT

First American Title

LOCATION

Las Vegas, Nevada

WORKPLACE

Furniture installation

INTERFACES

Electrical and glass panels

ACOUSTICS

Sound-masking services

DELIVERY

Coordinated workplace scopes

+ THE INTERIOR SCOPE

FURNITURE AND POWER. CONNECTED IN THE FIELD.

Workstation components, storage and electrical interfaces come together at the installation stage. ASI connected furniture placement with defined infrastructure work in the office.

ACOUSTICS

SOUND-MASKING SERVICES

COORDINATE THE INTERFACES

Furniture placement and electrical work were connected parts of the workplace assignment. ASI coordinated the defined installation scopes and the physical interfaces between the workstations and office infrastructure.

KEEP FOLLOW-UP CONNECTED

Later requests included electrical repair and other adjustments at the same Las Vegas workplace. ASI connected those specific services to the installed office rather than treating each request as an unrelated project.

+ THE OUTCOME

ONE COORDINATED WORKPLACE SCOPE. A PARTNER FOR THE FIELD INTERFACES.

The assignment connected furniture installation, electrical work, glass panels and sound-masking services at one Las Vegas workplace. Follow-up requests remained tied to that office and its defined scopes.

INSTALL

WORKPLACE FURNITURE

Furniture placement and reconfiguration connected to the office layout.

CONNECT

DEFINED INFRASTRUCTURE

Electrical interfaces and sound-masking services joined the workplace scope.

COORDINATE

FOLLOW-UP REQUESTS

Specific adjustments and repair services remained connected to the same office.

WHAT THE PROJECT DELIVERED

WORKPLACE INSTALLATION

Furniture and storage handling were coordinated with installation and reconfiguration.

ELECTRICAL INTERFACES

Defined circuits and power-distribution work supported the workplace scope.

GLASS AND ACOUSTICS

Glass-panel and sound-masking services formed separate parts of the coordinated assignment.

FOLLOW-UP SERVICES

Later electrical repair and adjustment requests remained tied to the same Las Vegas office.

ONE ACCOUNTABLE PARTNER. FROM FURNITURE TO DEFINED FIELD SERVICES.

DELIVERY RESULT

ASI brought furniture, electrical interfaces, glass panels, acoustics and follow-up requests together under one accountable workplace execution partner.
