+ FURNITURE CLEARANCE AND SPECIALTY CLOSEOUT

DISMANTLE.
CLEAR.
FOLLOW THROUGH.

ASI connected furniture dismantling, coordinated loadout, recycling, localized repairs and specialty closeout for Siemens' Huntington Beach workplace.

SEQUENCE	CLEAR	CLOSE
INSTALLERS AND MOVERS	WORKPLACE CONTENTS	SPECIALTY FOLLOW-THROUGH

OVERVIEW

CHALLENGE

A furnished office exit needed more than trucks. Workstations and storage had to come apart before removal crews could load out, while building access, recycling and follow-on service work required coordination.

ASI APPROACH

Working through Atlantic Relocation, ASI organized the dismantling and removal sequence, coordinated recycling logistics and carried localized wall work, electronic-waste disposal and locksmith service through closeout.

RESULTS

- Furniture cleared from the office footprint
- Removal crews and recycling coordinated
- Specialty closeout work carried through

SIEMENS | HUNTINGTON BEACH

At Siemens' Center Avenue workplace, ASI connected field labor, material removal and follow-on services in one office-exit assignment. The work paired a planned crew handoff with practical follow-through beyond the main furniture clearance.

FOCUS
Coordinated office exit

STATUS
Completed documented scopes

+ EARLY WORKPLACE LAYOUT AND REMOVAL SEQUENCE

READ THE WORKPLACE.
ORGANIZE THE EXIT.

The early test-fit plan shows open workstation areas, enclosed offices, meeting space and circulation. It provides spatial context for the removal scope, not a record of construction performed by ASI.

DISMANTLING BEFORE LOADOUT

FOLLOW-THROUGH
REPAIRS AND SPECIALTY WORK

+ THE ASI DELIVERY MODEL

CONNECTED CREWS.
A COORDINATED CLOSEOUT.

ASI worked with the relocation partner to connect the office dismantling crew, moving resources and follow-on service providers. Defined responsibilities kept the removal sequence distinct from building-system work by others.

PLAN

COORDINATE THE CREW HANDOFF

Organize daytime dismantling before the later moving crew, with truck resources and building access considered together.

REMOVE

CLEAR FURNITURE AND CONTENTS

Dismantle office furniture, coordinate removal for recycling or disposal, and clear remaining contents within the walkthrough scope.

RECYCLE

PLAN MATERIAL HANDLING

Coordinate metal-recycling bin delivery and pickup with the removal sequence. Track electronic-waste disposal as a separate closeout scope.

REPAIR

ADDRESS LOCALIZED WALL AREAS

Carry the added refrigerator removal and localized patching, sanding and paint work into the office-exit scope.

CLOSE

COMPLETE SPECIALTY FOLLOW-THROUGH

Coordinate expedited locksmith service and document the completed work through signed field closeout.

SCOPE
Office clearance and closeout

INTERFACE
Installers, movers and specialists

STATUS
COMPLETED SCOPES

ONE TEAM CONNECTED THE FIELD INTERFACES

The field plan paired an installation crew with a later moving crew and a dedicated recycling-bin sequence. Electrical disconnect and safe-off remained a prerequisite by others, not an ASI-performed scope. Follow-on services were tracked separately from the main clearance.

FURNITURE CLEARANCE AND SPECIALTY FOLLOW-THROUGH CONNECTED IN ONE ASSIGNMENT.

+ THE OUTCOME

CLEARED OFFICE SPACE.
FOLLOW-THROUGH BEYOND THE MOVE.

The workplace was cleared of furniture and designated contents, with broom-sweep and trash removal in the closeout scope. Localized wall work, electronic-waste disposal and locksmith service extended the assignment beyond the main loadout.

CLEARED

OFFICE FOOTPRINT

Workstation and storage areas were opened through furniture dismantling and coordinated removal.

CONNECTED

CREWS AND MATERIALS

Installation labor, moving resources and recycling logistics were organized around the same office exit.

CLOSED

SPECIALTY SERVICES

Follow-on disposal, localized repairs and locksmith work remained part of the closeout responsibilities.

WHAT THE PROJECT DELIVERED

ONE COORDINATED OFFICE EXIT

The removal sequence connected people, material handling and building access instead of treating each as an isolated task.

CLEAR SCOPE BOUNDARIES

Furniture and content removal were distinguished from prerequisite electrical work and unselected optional scopes.

PRACTICAL MATERIAL HANDLING

Recycling, disposal and electronic waste were addressed through defined removal responsibilities.

FOLLOW-THROUGH AFTER LOADOUT

Localized surface work and signed locksmith closeout supported the remaining project responsibilities.

ONE ACCOUNTABLE PARTNER.
DISMANTLING. CLEARANCE. FOLLOW-THROUGH.

DELIVERY RESULT

ASI connected the people and specialty services needed to move a furnished workplace through clearance and closeout.

PLANNING A COMPLEX OFFICE EXIT?

ASICOINC.COM | PROJECTS@ASICOINC.COM

+ FIELD EXECUTION

FROM FURNISHED WORK AREAS TO CLEARED OFFICE SPACE.

The office moved from furnished workstation and storage areas to cleared interiors. The localized wall-preparation view shows that repair stage separately from the completed furniture clearance.

OFFICE FURNISHINGS | BEFORE

OFFICE CLEARANCE | COMPLETED

WORKSTATIONS | BEFORE

WALL PREPARATION | IN PROGRESS

BREAKROOM CLEARANCE | COMPLETED

CLEARANCE AND FOLLOW-THROUGH

Different work areas show the breadth of the office clearance. Localized repair work is shown at its own stage, without implying a full office renovation.
