+ INTERIOR REPAINT AROUND AN EXISTING WORKPLACE

PREPARE THE SURFACES. RENEW THE WALLS. KEEP THE SETTING.

ASI refreshed office and kitchenette walls at Realogy's Glendale location, combining surface preparation, repainting and added wall areas around the existing interior.

MULTI-AREA WALLS

ADAPT
ADDED WALL SCOPE

OVERVIEW

CHALLENGE

The repaint reached blue and white wall areas behind existing workstation furnishings and beside kitchenette cabinets. The crew needed access to those surfaces, while an additional wall-painting scope expanded the assignment.

ASI APPROACH

ASI organized the wall work around the retained office setting, patched and primed holes, and applied the specified coats. The added white-wall areas were incorporated into the same repaint assignment.

RESULTS

- Renewed office wall surfaces
- Prepared and painted kitchenette walls
- Additional white-wall areas completed

REALOGY | GLENDALE

This commercial repaint brought surface preparation and finish painting together across several workplace areas. Existing cubicles, cabinetry, countertops and flooring remained the context for the work, rather than becoming a separate renovation scope.

STATUS
Completed

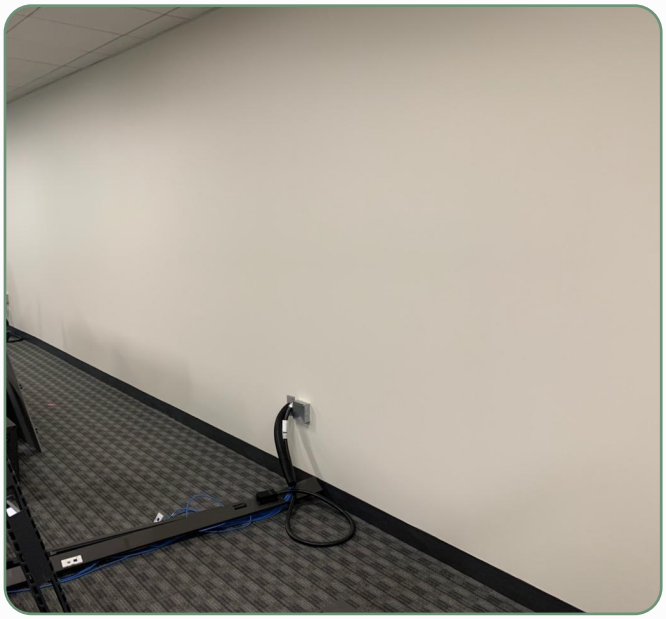

+ THE WORKPLACE SETTING

BEHIND THE WORKSTATIONS.
ACROSS THE OFFICE WALLS.

Wall access and surface preparation shaped the repaint. The blue-wall view shows the existing finish and fixing points; the later view shows renewed wall surfaces beside the retained office furnishings and floor.

RENEW THE INTERIOR FINISH

ACCESS BEFORE FINISH WORK

Furniture needed to be moved away from the designated walls to give the painting crew working access. That interface made the existing workplace layout part of the preparation, not just the backdrop to the final finish.

ADDITIONAL WALLS INCLUDED

The original blue- and white-wall assignment grew to include further white-wall areas. Preparation, patching and priming carried through those added areas before the finish coats.

+ FIELD EXECUTION

THE PREPARATION MATTERS.
SO DO THE FINISH EDGES.

Preparation views show patched surfaces and protected work areas. The kitchenette view shows the completed wall finish meeting existing cabinets, countertop, outlets and base without replacing those elements.

WALL PREPARATION | IN PROGRESS

KITCHENETTE WALL FINISH | COMPLETED

PREPARATION AROUND THE WORK AREA

Patching and priming addressed fixing points and existing wall conditions. Floor protection and moved furnishings remained visible during the painting stage.

FINISH WORK BESIDE RETAINED FIXTURES

Painting carried through the exposed wall surfaces around the retained cabinets and countertop. Existing outlets and base defined the finish edges.

SURFACE PREPARATION AND FINISH PAINTING

The assignment connected practical wall access, preparation and finish coats across the office and kitchenette, including the added white-wall scope.

+ THE OUTCOME

INTERIOR WALLS RENEWED.
THE EXISTING WORKPLACE RETAINED.

Prepared and repainted surfaces refreshed the office and kitchenette walls. The work addressed the visible wall conditions while retaining the surrounding furnishings, cabinets and floor finishes.

PREPARED

PATCHING AND PRIMING

Wall preparation addressed holes and existing surface conditions before the finish coats.

REPAINTED

OFFICE AND KITCHENETTE

Renewed wall finishes extend through the photographed workstation and kitchenette areas.

EXTENDED

ADDITIONAL WHITE WALLS

The added wall areas were incorporated into the same painting assignment.

WHAT THE PROJECT DELIVERED

SEVERAL WALL AREAS, ONE ASSIGNMENT

Blue- and white-wall work was coordinated with the added white-wall painting scope.

THE SETTING REMAINED IN PLACE

The finished walls meet the existing cabinetry, cubicle setting, outlets and floor.

PREPARATION BEFORE PRESENTATION

Patching and priming formed part of the scope behind the renewed painted surfaces.

A FOCUSED COMMERCIAL REFRESH

The project concentrated on the wall finish and its interfaces with the existing workplace.

ONE ACCOUNTABLE PARTNER.
PREPARATION THROUGH THE FINAL COAT.

DELIVERY RESULT

ASI delivered a multi-area interior repaint with surface preparation and additional wall scope at Realogy's Glendale office.
